¹ 1993-2002 Population: E-2 Reports, Population Estimates for California State and Counties. 2003 Population: Population Estimates for California State and Counties, Report E-2, February 2004. Population data for 2003 are provisional.

² Unknown cases were subtracted from totals before percentages were calculated.

^a 1993-1996 Population: 1990-1999 Race/Ethnic Population with Age and Sex detail, May 2004. 2000-2003 Population: 2000-2050 Race/Ethnic Population Projections with Age and Sex Detail, May 2004.

^b Starting in 1997 marital status was no longer inferred. Due to this change there were 16,712 cases in 1997 coded unknown.

^c Due to data collection changes, the number of unknowns increased in 1998, then began to decline. In no case did the percent of unknowns exceed 0.3 percent.

Note: Birth rate is per 1,000 population; teen rates are per 1,000 females of specified ages.

Low birthweight is under 2,500 grams; very low birthweight is under 1,500 grams.

Late prenatal care is that beginning in the third trimester.

Infant mortality rate is deaths to infants under one year of age per 1,000 live births.
